

Date: 03/23/2022

Page: 1 of 1

With a focus on MacLean Power Systems core competencies and to provide the best value and service for our customers, MPS finds it necessary to consolidate specific offerings of the fiberglass hardware product line, which includes brackets and guy strain insulators.

The offerings contained in this notice are either being consolidated or in cases where no alternative offerings are available, discontinued. Several driving factors for these changes include low annual demand, component availability, availability of alternate and functional catalog numbers, or changes in production processes.

Specifically, for included fiberglass brackets, production process changes will affect the need for consolidations. Currently, fiberglass brackets have the end fittings attached with either an epoxy or crimping process. MPS's goal is consolidate toward implementing 100% crimped designs. Crimping the fittings provides for a secure and reliable attachment solution to the fiberglass rod and aligns with new production procedures being implemented for MacLean Power Systems Foundry expansion at the Alabaster, Alabama location. In some instances, in addition to going from an epoxy to a crimped fitting, the material and features of the fitting may also change to accommodate the crimping process and provide a more reliable supply chain of products. Customers should verify that the new crimped equivalent catalog number is compatible with the application it is being used for.

The completion of the foundry expansion is targeted for May 2022. The expansion will centrally locate all Alabama operations under one roof as well as add operational, quality, safety, supply chain consistency, and environmental system improvements to our production processes.

Figure 1 – MacLean Power Systems 168,000 sq. ft. Foundry of the Future Expansion at Alabaster, Alabama

As of this notice, MPS will discontinue taking new orders for catalog numbers that are scheduled for obsolescence. Affected catalog numbers are listed in the appendices A1 – A7 attached to this notice.

Catalog numbers being consolidated with a functional equivalent are also noted in the appendices B1 – B6. Customers should verify all alternatives to make sure they are fully compatible with the application they are intended for. Please update standards accordingly and contact your MPS representative for assistance in specifying alternative materials as needed.

Open orders for items in this notice will be produced as scheduled, and conversions to the crimped bracket catalog numbers will take place once the new facility is operational.

Please contact your MPS representative with any questions you may have about this change.
